PROFESSIONAL SUMMARY

I am a motivated Software Engineer specializing in Java-based backend development, while continuously expanding my expertise in frontend technologies like React. My most recent personal project is a Spring Boot application that performs LLM-based data extraction on resumes and evaluates them based on specified criteria. As a quick learner who grasps new concepts easily and quickly, I bring a proactive mindset, strong problem-solving skills, high attention to detail and precision, effective time management, and excellent communication skills to an agile development team.

TECHNICAL SKILLS

- **Programming languages:** Java, C#, Python, JavaScript, TypeScript
- **Frameworks:** Spring, Spring Boot, Node.js, React, Ktor
- **Databases and formats:** PostgreSQL, MySQL, MariaDB, JSON, XML, CSV
- **Tools and DevOPS:** Maven, Gradle, Git version control, Containerization with Docker, Postman
- **Methodologies:** REST API development, Test Driven Development (TDD)
- **Office Software:** MS Office (Excel, Word, PowerPoint)
